

System Variables

This document describes the Natural system variables.

Natural system variables contain information about the current Natural session, such as: the current library, the user and terminal identification; the current status of a loop processing; the current report processing status; the current date and time. They may be referenced at any point within a Natural program.

System Variables Grouped by Function

- Application Related System Variables
- Date and Time System Variables
- Input/Output Related System Variables
- Natural Environment Related System Variables
- System Environment Related System Variables
- XML Related System Variables
