

# SYSPROD

This command applies to all platforms.

SYSPROD

With the SYSPROD command, you can ascertain which products are installed at your Natural site. You are given information on your current Natural version, Natural Selectable Units and products running with or under Natural.

When you enter the command, a window is displayed, listing the following information for each product installed:

- the product name,
- the product version,
- the system maintenance (SM) level,
- the installation date.

For some of the products listed, you can get additional information by marking them with a command. For a list of available commands, enter a "?" in the "Cmd" column of the SYSPROD window.
