

# TEST

This command is for Mainframes only.

The image shows the command 'TEST' followed by a bracketed menu containing 'ON' and 'OFF' options, all on a yellow background.

With the TEST command, you invoke the Natural Debugger which is one of the Natural Test Utilities.

TEST	If you enter the system command TEST without parameters, the main menu of the Natural Debugger is displayed.
TEST ON	Activates the test mode of the Debugger.
TEST OFF	Deactivates the test mode of the Debugger.

To invoke the debugging facility from any point in an application, you can also use the terminal command %<TEST.

For information on the Natural Debugger, see the relevant documentation in the section Debugging and Monitoring in the Natural Utilities documentation. This section also contains information on other Natural utilities used for online testing and monitoring.
