

# %S - Resume Screen Capturing

**Note:**

This command is not available with Natural for Windows.

---

**Command Syntax**

<b>%S</b>
-----------

This command is used to resume the capturing of screens by the NATPAGE screen paging function (NATPAGE utility).

The capturing of screens (which is activated with the terminal command %P) can be interrupted with the terminal command %O. After it has been interrupted, you can use the terminal command %S to resume the capturing of screens.

See also the terminal commands %E, %I, %O and %P.
