

END/STOP Statements

The following topics are covered:

- End of Program - END Statement
 - End of Application - STOP Statement
-

End of Program - END Statement

The END statement is used to mark the end of a Natural program, subprogram, external subroutine or help routine.

Every one of these objects must contain an END statement as the last statement.

Every object may contain only one END statement.

End of Application - STOP Statement

The STOP statement is used to terminate the execution of a Natural application. A STOP statement executed anywhere within an application immediately stops the execution of the entire application.
