

Assigning Attributes to the Dialog Elements

▶ To assign attributes to the dialog elements

1. Double-click on the Text Constant Control "#TC-1".
The corresponding attributes window appears.
2. In the "String" entry, type in the text string to be displayed: Initial value.
3. Choose OK or press ENTER.
The attributes window closes.
4. Set the following text strings for the four text constant controls below: Percentage Applicable, Number of Years, Degressive Depreciation, Depreciated Value.
5. From the three input field controls, remove any text string
6. Set the following text string for the Push Button Control: "Calculate..."
7. From the last text constant control, remove any text string.
It will be used for output purposes.

Your dialog should now look like this:
