

Attaching Event Handler Code to the Dialog Element

▶ To attach event handler code

1. Select the Push Button Control labelled "Calculate...".
2. From the menu bar, select "Control > Event Handlers..." The corresponding Event handler definition section appears.
The "Click" Event is preselected: when the end user clicks on this push button control, the specified Natural code will be triggered.
3. In the event handler editing area, enter the following Natural code in free form:

```
#RESULT:= #INITIAL-VALUE * ( ( 100 - #PERC-APPLIC )  
/ 100 ) ** #YEAR-NUM )  
MOVE EDITED #RESULT (EM=Z(5)9.99) TO #TC-6.STRING
```
4. Choose OK to close the editing area, and choose OK again to close the attributes window.
