From the main menu of the SYSERR utility, you can execute all functions available for adding and maintaining messages. The individual functions are explained in the section Functions. The parameters that apply with the functions are explained in general in the section Parameters; any restrictions that apply to the use of these parameters are described for each function concerned in the section Functions.

The SYSERR utility provides an extensive online help system. To obtain field-specific help information, either enter a question mark in the relevant field and press ENTER or place the cursor in the field and press PF1.
