

Modifying the Color Scheme

You can define another color scheme to be used for the current session directly from the terminal application. Your modifications are stored for the next session.

To activate another color scheme

1. From the **Session** menu, choose **Color**.
The "Color Selection" dialog box appears.
The active color scheme is indicated by an arrow.
2. Select the color scheme you want to activate.
3. Choose the **OK** button.

Command Buttons

Besides activating another color scheme, you can also create, modify, delete or duplicate a color scheme directly from the terminal application. To do so, use one of the following command buttons in the "Color Selection" dialog box:

Modify	Modifies the selected color scheme. You can only modify the color scheme which is currently active. If you select another color scheme, you are asked whether you want to make the selected color scheme active in order to continue.
New	Creates a new color scheme. Specify a name for the new color scheme in the resulting dialog box and choose the OK button. You are then asked whether you want to make the new color scheme active in order to modify it.
Delete	Deletes the selected color scheme. You are asked to confirm the deletion.
Duplicate	Creates a copy of the selected color scheme. Specify a name for the copy in the resulting dialog box and choose the OK button. You are then asked whether you want to make the copy active in order to modify it.
