

CMWRKnn - Natural Work Files

This Natural profile parameter is for UNIX/OpenVMS and Windows. It applies to batch mode only.

CMWRKnn is used for Natural work files referenced by any Natural program executed during the session. "nn" is a two digit decimal number in the range 01 to 32 corresponding to the number used in a READ WORK FILE or WRITE WORK FILE statement.

Possible settings	any string	Example for OpenVMS: CMWRK05 = ALF\$USER:[home.tmp]workfile5.sag Example for UNIX: CMWRK05 = \$HOME/tmp/workfile5.sag Example for Windows: CMWRK05=C:\tmp\workfile5.sag
Default setting	none	
Dynamic specification	YES	
Specification within session	NO
