

UC - Underlining Character

Parameter	Possible Values	Default Value	Applicable Statements
UC	any character, OFF	- (hyphen)	DISPLAY FORMAT

This session parameter determines the character that is used as underlining character for the following:

- column headings generated by DISPLAY statements;
- page titles/trailers produced by WRITE TITLE / WRITE TRAILER statements with UNDERLINED option.

If you do not wish column headers to be underlined, you have two options:

- "UC= " - A blank line will be output instead of underlining.
- UC=OFF - The field values will be output immediately below the heading line, without any blank line in between.

You can specify UC=OFF only at the statement level of a DISPLAY statement; in this case, you cannot make any other UC specifications for individual fields in that statement.

Examples:

```
FORMAT UC=*
DISPLAY (UC= ) NAME AGE (UC=+)
```
