

SYRPC - Basic Functionality

This section covers the following topics:

- Invoking SYRPC
 - Terminating SYRPC
 - Help
-

Invoking SYRPC

There are two ways of invoking the SYRPC utility:

► **To invoke SYRPC online from a Natural library**

- Enter the direct command SYRPC.
The Client Maintenance screen of the SYRPC utility appears.

From the Client Maintenance screen, you can invoke all functions available for RPC maintenance:

- Service Directory Maintenance
(under Natural RPC 5.1 or current Natural RPC)
- Stub Generation
- Parameter Maintenance
- Server Command Execution
(under Natural RPC 5.1 or current Natural RPC)
- Remote Directory Maintenance

See the corresponding sections for a description of these functions.

Terminating SYRPC

► **To exit the SYRPC main menu**

- In the Code field, enter a period (.).
Or choose PF3/Exit.

Help

To invoke the online help function, choose PF1/Help.
