

ATTN - Attention Key Interrupt Support

This Natural profile parameter is for mainframes only.

It controls the use of the attention key for IBM SNA terminals. Pressing the attention key can interrupt Natural processing with an appropriate error message (NAT1016). The availability of an attention key depends on the environment and on the terminal type.

This functionality is also available for Natural in Batch under VSE/ESA.

Possible settings	ON	The attention key causes Natural processing to be interrupted.
	OFF	The attention key is ignored.
Default setting	ON	
Dynamic specification	YES	
Specification within session	NO
