

BMBLANK - Display Trailing Blanks

This Natural profile parameter is for UNIX/OpenVMS and Windows platforms and applies to batch mode only.

It is used to control the display of trailing blanks in the batch output file CMPRINT.

This parameter applies only if the parameter BMSIM is set to MF. Trailing blanks are generated automatically if BMSIM is set to MF. BMBLANK has no effect if BMSIM is set to OS or VM.

Possible settings	ON	Trailing blanks are written to CMPRINT.
	OFF	No trailing blanks are written to CMPRINT.
Default setting	ON	
Dynamic specification	YES	
Specification within session	NO
