

BROKER - Specify EntireX Broker Parameters

As of Natural RPC Version 5.1.1, the Natural profile parameter BROKER enables you to specify EntireX Broker parameters that are specific for Natural RPC.

EntireX Broker parameters are specified as subparameters using the notation *subparameter=value*. The specified subparameters are evaluated by the Natural RPC. As of Natural RPC Version 5.1.1, the EntireX Broker parameters ENCRYPTIONLEVEL and SSLPARMS may be specified.

Possible settings	???	????
Default setting	?	
Dynamic specification	?	
Specification within session	?	

Example:

```
BROKER=(ENCRYPTIONLEVEL=3,SSLPARMS="TRUST_STORE=c:/certs/CaCert.pem&VERIFY_SERVER=Y")
```
