

# CMPO - Compilation Options

This Natural profile parameter is for mainframes only.

It can be used, at session start, to specify dynamically or to override the same options which you can specify statically with the NTCMPO macro in the parameter module or, during an active session, with the COMPOPT system command.

<b>Possible settings</b>	see COMPOPT system command	
<b>Default setting</b>	see COMPOPT system command	
<b>Dynamic specification</b>	YES	This parameter can only be specified dynamically.
<b>Specification within session</b>	NO
