

IA - Input Assign Character

This Natural profile parameter is for:

- mainframes
- UNIX/OpenVMS and Windows

It defines the character to be used as the assignment character for the input parameter processing in INPUT statements, either in keyword/delimiter mode or when processing data from the Natural stack.

Possible settings	any special character	Assignment character for the input parameter processing in INPUT statements. The character specified with the IA parameter must not be the same as the character specified with the CF parameter (control character for mainframe terminal commands), DC parameter (decimal character) or ID parameter (input delimiter character); it should not be the same as the one specified with the HI parameter (help character).
Default setting	=	
Dynamic specification	YES	
Specification within session	YES	Within a Natural session, the profile parameter IA can be overridden by the session parameter IA .
