

# LE - Reaction when Limit for Processing Loop Exceeded

This Natural profile parameter is for:

- mainframes
- UNIX/OpenVMS and Windows

It controls the action to be taken if the limit specified for processing loop execution is exceeded.

<b>Possible settings</b>	ON	Loop execution is aborted and an error message is issued at the end of the Natural program.
	OFF	Loop execution is aborted and processing continues without an error message.
<b>Default setting</b>	OFF	
<b>Dynamic specification</b>	YES	
<b>Specification within session</b>	YES	Within a Natural session, the profile parameter LE can be overridden by the <b>session parameter</b> LE.
