

ZD - Zero-Division Check

This Natural profile parameter is for:

- mainframes
- UNIX/OpenVMS and Windows

It indicates the action to be taken when an attempt is made to perform a division operation in which the divisor is "0".

Possible settings	ON	Natural issues an error message if a division by "0" is attempted.
	OFF	Natural returns "0" for any division operation in which the divisor is "0".
Default setting	ON	
Dynamic specification	YES	
Specification within session	YES	Within a Natural session, the profile parameter ZD can be overridden by the session parameter ZD .
