

MC - Multiple-Value Field Count

Note:

This parameter may be used in reporting mode only.

Parameter	Possible Values	Default Value	Applicable Statements
MC	1 to 191	1	DISPLAY FORMAT INPUT PRINT WRITE

With this parameter, you determine the number of values of a multiple-value field to be output by default when the field is specified without an index in a DISPLAY or WRITE statement.

Example:

```
FORMAT MC=5
```
