

# Applying Service Packs or Subsequent System Maintenance Levels

When migrating from Predict Version 4.2.1 to Predict Version 4.2.n (n > 1), please observe the information below. If you have already installed Predict Version 4.2.1 in your environment, no conversion of your FDIC file is necessary.

Perform the following steps:

▶ **Step 1: Save the user exit routines, other programs delivered in source form, and help texts if you modified them**

▶ **Step 2: Start the installation process.**

Enter the command:

```
@SAG$ROOT : [ NATURAL . COMMON ] SAGINPL . COM
```

▶ **Step 3: Select your Natural version**

All Natural versions installed under SAG\$ROOT : [ NATURAL ] will be displayed.

Select a Natural version. The main menu is displayed.

▶ **Step 4: Specify a Natural parameter module**

Choose function 1 from the installation menu.

Specify a Natural parameter module that will then be displayed.

Check your FNAT/FUSER settings.

▶ **Step 5: Specify the INPL dataset for update**

Choose function 2 from the installation menu.

You can specify an INPL dataset path and name for update.

**Note:**

The INPL dataset is a text file. It includes a list of files to be loaded by the INPL utility.

**Important:**

Set the dataset format to Portable.

▶ **Step 6: Load Predict modules into Natural**

Choose function 2 from the installation menu.

The Predict modules are loaded into Natural.

▶ **Step 7: Print the readme file**

In function 4, you can specify whether you want to print the Readme file.

▶ **Step 8: Restore the objects you saved in Step 1 of this description.**
