

Database

Databases and data storage systems of different types are documented with objects of type *database*.

In the Predict metastructure a database can/must have passive and active associations of the following types:

Valid passive association: *Belongs to VM* (mandatory for most database types)

Valid active associations: *Contains DC*
Contains FI (default active association)

This section covers the following topics:

- Database Maintenance Menu
- Documenting Databases of Different Types
- Database Specific Maintenance
- Database Retrieval
