

End-of-Job Actions

For each specified event, the user can define how Entire Operations has to react. Such system action can consist of any of the following:

- Automatically set or reset the output conditions associated with this event (see the subsection Output Conditions);
- Send a message to a specific operating system user, the system console, an Entire Operations mailbox, Software AG's office automation system Con-nect, or to an e-mail address;
- Cancel or print job protocol and output;
- Perform a recovery (if a job or job step failed);
- Pass files to Entire Output Management (NOM).
