

Introduction

This section covers the following topics:

- Introduction to Entire Operations
 - Operating System Designations
-

Introduction to Entire Operations

Entire Operations is a Software AG product for the automatic control of batch processing in the computer center. This manual is intended as a guide for the system programmer who maintains the Entire Operations environment. It describes how to install Entire Operations, how to maintain user profiles, resources and mailboxes, how to define nodes and system defaults, as well as how to control the Entire Operations Monitor.

Before reading this manual and putting its information into practice, you are advised to have at least a working knowledge of the Entire Operations Reference Documentation.

Operating System Designations

BS2000, MVS and VSE are short designations for the corresponding operating systems, which can be found on the individual screens in this manual and in the online help. But throughout the remaining text, their long names are consistently used, i.e., BS2000/OSD, OS/390 and VSE/ESA.

| Operating Systems | |
|-------------------|------------|
| Short Names | Long Names |
| BS2000 | BS2000/OSD |
| MVS | OS/390 |
| VSE | VSE/ESA |
