

Installing Updates

If an update for Entire Operations is to be installed, do the following:

1. Ensure that the Entire Operations Monitor is not active and that online users have logged off. Otherwise, data can be lost or corrupted.
2. Copy the update completely to the affected target libraries. Verify this.
3. When the new modules are in place, purge the Natural buffer pool for online and/or monitor usage.
4. In the Entire Operations main menu, enter the direct command "TECH". The version information is displayed and updated for monitor usage.

The monitor error transaction is able to detect a version mix if a runtime error occurs. In this case, all monitor tasks will immediately be terminated with an error message.
