

# Deleting a Job Definition

▶ **To delete a job definition**

1. Type **D** in the line command line of the selected job in the Job Maintenance screen.
2. Press Enter.

A window opens in which **Entire Operations** asks you to confirm the deletion by entering the job name.

3. Press Enter to delete the job definition.

**Note:**

Deleting a job definition also deletes all definitions made at the job level via the Job Maintenance screen. The original JCL is not deleted.
