

Turn of the Year

This subsection covers the following topics:

- Schedule Dependencies across the Turn of the Year
- Deleting Entries

Schedule Dependencies across the Turn of the Year

Schedule dependencies can also be defined across the turn of the year. This applies in particular to the week, which begins in the old year and ends in the new year.

This functions only if the schedules and calendars used are defined for **both** years.

Deleting Entries

You can delete your entries in the fields Usage, Type, in Period and in Position from the Schedule Dependency for Job window.

 **To do so**

1. Press PF9 (Delete).

The following window opens:

```

15.11.01          *** Entire Operations 4.1.1 ***          09:24:50
