

List Jobs in Sub-Network

(Master and Active)

If a master or active job has the type NET, you can invoke the the master or active job list of the defined sub-network directly.

 **To view the job list of the sub-network**

- Type **Z** in the line command input field of the selected job in the Job Maintenance screen or Active Jobs screen and press Enter.

The master or active job list of the sub-network will open.

Note:

If you leave the sub-network job list with PF3, you will return to the calling network list.
