

# Importing Operating System Jobs into the Active Queue

You can activate a job in Entire Operations together with an existing operating system job number. This is possible if the job was submitted by any application and set to HOLD status.

Use the following statement:

```
CALLNAT 'NOPUJI4N'  
  P-FUNCTION P-RC P-OWNER P-NETWORK P-JOB P-RUN P-EXECUTION-NODE P-SYSOUT-NODE  
  P-SYSOUT-FILE P-BS2000-MONJV P-JOB-ID-10 P-OS-JOB-NAME
```

Meaning of the parameters:

Parameter	Format	Usage		
P-FUNCTION	A01	in	Function code:	
			<b>I</b>	Import job, without prerequisite check.
			<b>J</b>	Import job, with prerequisite check.
P-RC	N03	out	Return code:	
			<b>0</b>	Function ok.
			<b>101</b>	Invalid function code.
			<b>102</b>	Parameter(s) missing.
<p>The parameters P-OWNER, P-NETWORK, P-JOB and P-RUN are optional. If any of these are empty, IMPORT is used instead as owner, network and/or job name. Entire Operations will try to find a job definition for these values. If a definition is found, the new active job entry is supplied from it. Otherwise, an ad-hoc activation is performed.</p>				
P-OWNER	A10	in	Optional.	
P-NETWORK	A10	in	Optional.	
P-JOB	A10	in	Optional.	
P-RUN	P13	in	Optional. If P-RUN is set to <b>zero (0)</b> , Entire Operations assigns a new run number; otherwise, the job is activated under the run number given. Master jobs <b>for imports with run number</b> must be defined with the special type R to prevent automatic activation.	
P-EXECUTION-NODE	I4	in	Required.  <b>Note:</b> Format was changed. Previous API version used was N3 in this case.	
P-SYSOUT-NODE	I4	in	Optional. Necessary only if P-SYSOUT-FILE is specified, and if P-SYSOUT-NODE is different from P-EXECUTION-NODE.	
P-SYSOUT-FILE	A250	in	Required for BS2000/OSD, Unix, Windows. File which contains the Sysout.	
P-BS2000-MONJV	A250	in	Optional. BS2000/OSD monitor job variable. Specify this parameter only for BS2000/OSD, and only if the job was started in conjunction with a monitor job variable.	
P-JOB-ID-10	A10	in	Required. The Job Id can be passed leftbound in this field, regardless whether it is numeric or alphanumeric.  <b>Note:</b> Format was changed. Previous API version used was A5 in this case.	
P-OS-JOB-NAME	A08	in	Optional; from operating system.
