

Starting and Stopping the Monitor Activity Log

You can start and stop the monitor activity log using the following calls from your Natural application.

```
CALLNAT 'NOPMLA1N'  
P-FUNCTION
```

The parameters have the following meaning:

Parameter	Format	Use	
P-FUNCTION	A01	in	Function code:
		Y	Starting the monitor activity log.
		N	Stopping the monitor activity log.

The call of this API has the same effect as setting the field Log Monitor Activity in the Monitor Defaults.

This enables you to automatically start and stop the monitor activity log at particular times or on account of specific conditions.
