

Natural Shared Nucleus under OS/390 and VSE/ESA

As the function and the use of the shared nucleus are almost identical under the operating systems OS/390 and VSE/ESA. To avoid redundant descriptions, reference is made to the corresponding document for the OS/390 environment. There, the following topics are covered:

- Environment-Independent Nucleus
- Creating a Shared Nucleus
- Installing a Shared Nucleus
- Linking Subproducts to the Nucleus
- Single-Environment Shared Nucleus
- Environment-Dependent Nucleus
- Statically Linked Non-Natural Programs
- Dynamically Called Non-Natural Program
