

# Natural in Batch Mode - Overview

This document contains considerations that apply when running Natural in batch mode.

The following topics are covered:

- **Natural in Batch Mode** contains general considerations that apply when running Natural in batch: datasets required, Natural datasets, Adabas datasets, sort datasets, subtasking session support for batch environments.
- **Natural in Batch under OS/390** provides special considerations that refer to Natural in batch mode under the operating system OS/390.
- **Natural in Batch under VSE/ESA** provides special considerations that refer to Natural in batch mode under the operating system VSE/ESA.
- **Natural in Batch under CMS** provides special considerations that refer to Natural in batch mode under CMS.
- **Natural in Batch under BS2000/OSD** provides special considerations that refer to Natural in batch mode under the operating system BS2000/OSD.
