

DBLOG Utility - Logging Database Calls

The DBLOG utility is used to log Adabas commands, DL/I (and SYNC/ROLB) calls, or SQL statements. Logging is useful for tuning an application (controlling the flow of commands accessing the database) and for analysing error codes that may be returned from the database.

Related Documentation:

Adabas, DL/I and DB2.

This section covers the following topics:

- Executing DBLOG
- DBLOG Menu
- DBLOG Trace Screen
- DBLOG Snapshot Function
- DBLOG Direct Commands
