

# RELIST Command for Lists

In most of the Natural LIST sessions, the command RELIST is available to rebuild the list to reflect changes from line commands like DELETE, RENAME or EDIT.

This command does not apply to so-called refreshable lists like list of jobs, which are rebuilt whenever the user presses Enter without entering a command.

## Example:

This example shows a list of PDS members after execution of the DELETE line command on a number of members:

```
LIST-PDS:BRY.COMN.SOURCE(H*) ----- >>> Member H11000 deleted
COMMAND====>                                     SCROLL====> CSR
MEMBER          VV.MM  CREATED  MODIFIED TIME  SIZE  INIT  TID  ID
** ***** top of list *****
HELP            01.04  19970202 19970202 15:19   71   51   BRY
HELP1          01.99  19970203 19970208 17:27  153   63   BRY
HPSPPOOL       01.03  19980112 19980112 16:55   44   10   GW
H11000         *Deleted 01.01  19970318 19970318 14:42   20   20   BRY
H11002         *Deleted 01.01  19970318 19970318 14:43   29   29   BRY
H1100210       *Deleted 01.01  19970318 19970318 14:44   19   19   BRY
H11004         *Deleted 01.01  19970318 19970318 14:44   12   12   BRY
H11006         *Deleted 01.01  19970318 19970318 14:45   15   15   BRY
H11007         *Deleted 01.01  19970318 19970318 14:45   21   21   BRY
```

Below you can see the result of the RELIST command:

```
LIST-PDS:BRY.COMN.SOURCE(H*) ----- Row 0 of 3 - Columns 010 076
COMMAND====>                                     SCROLL====> CSR
MEMBER          VV.MM  CREATED  MODIFIED TIME  SIZE  INIT  TID  ID
** ***** top of list *****
