

Programmer's Guide - Overview

This documentation covers the following topics:

- Introduction Offers an introduction to the various sections of this documentation.
- Macro Facility Describes the Natural ISPF macro feature that allows you to use the Natural language to generate text of any kind.
- Incore Database Explains the Natural ISPF Incore Database facility which enables the Natural programmer to maintain complex data structures in the user memory and to perform complex actions on these structures.
- Open NSPF Provides information about the Open NSPF facility which enables you to modify and enhance Natural ISPF according to site-specific needs.
- Application Programming Interface Describes the programs which can be used in Natural applications (or in Open NSPF routines) to access Natural ISPF internal information.
- Authorization Classes Lists the available authorization classes and the Natural ISPF objects they refer to.
