

# PROPERTY

```
PROPERTY property-name  
  
      OF [INTERFACE ] interface-name  
      IS operand  
  
END-PROPERTY
```

---

## Function

The PROPERTY statement assigns an object data variable operand as the implementation to a property, outside an interface definition. It is used if the interface definition in question is included from a copycode and is to be implemented in a class-specific way.

It may only be used within the DEFINE CLASS statement and after the interface definitions. The interface and property names specified must be defined in the interface definitions.
