

FS - Default Format/Length Setting for User-Defined Variables

This Natural profile parameter is for:

- mainframes
- UNIX/OpenVMS and Windows

It only applies to reporting mode; it has no effect in structured mode.

This parameter indicates whether a default format/length setting is to be in effect for the definition of user-defined variables in reporting mode.

Possible settings	ON	No default format/length is assigned by Natural. The format/length of all user-defined variables must be explicitly specified.
	OFF	A user-defined variable in a Natural program for which no format/ length is specified is assigned the default format/length "N7".
Default setting	ON	
Dynamic specification	YES	
Specification within session	YES	Within a Natural session, the profile parameter FS can be overridden by the session parameter FS .
