

KD - Key Definition

Parameter	Possible Values	Default Value	Applicable Statements
KD	ON / OFF	OFF	FORMAT

This parameter is used to display the names assigned to the PF keys (see the SET KEY statement).

This information will always be displayed automatically in the two bottom lines of the physical screen with any output created by the INPUT, WRITE, DISPLAY, and PRINT statement.

As this display requires two lines, the logical page size (see the session parameter PS) must be reduced by two.

Note for graphical user interfaces:

If PF keys are defined, they are always displayed, regardless of the setting of this parameter. If no PF keys are defined, this parameter can be used to switch on/off the display of the ENTER key.

Example:

```
FORMAT KD=ON
```

[Back to Session Parameters.](#)
