

SYSRPC Utility - Overview

This documentation describes the Natural SYSRPC utility which is used to maintain remote procedure calls.

New Features with Natural RPC Version 5.1

With Natural RPC (Remote Procedure Call) Version 5.1, the Service Directory maintenance function provides new features. This documentation covers both the new features of the Service Directory under Natural RPC 5.1 and the previous features under Natural RPC 3.1.

For a summary of the new features, see Natural RPC Version 5.1.1 in the Natural 3.1.6 Release Notes for Mainframes.

Related topics:

- For information on how to apply the SYSRPC utility functions to establish a framework for communication between server and client systems, refer to the Natural RPC (Remote Procedure Call) documentation.
- For an explanation of expressions relevant to the SYSRPC utility see also Definition of Terms in the overview page of the Natural RPC documentation.

The SYSRPC Utility documentation covers the following topics:

	Basic Functionality	Invoking and terminating SYSRPC and commands, functions and options provided.
	Service Directory Maintenance: RPC 5.1 RPC 3.1	Maintaining client/server connections.
	Stub Generation	Generating client stubs.
	Parameter Maintenance	Modifying Natural RPC settings.
	Server Command Execution: RPC 5.1 RPC 3.1	Ping and Terminate.
	Remote Directory Maintenance	Maintaining client/server connections for a remote directory server.
