

J

JCL = Job Control Language

OS/390 and VSE/ESA operating systems: Control language used to describe a job and its requirements to an operating system.*

Jobs are needed for installing and maintaining Natural and executing Natural in batch mode.

JCS = Job Control Statement

VSE/ESA operating systems: Statement of the job control language (JCL).

JES = Job Entry Subsystem

OS/390: An IBM licensed program that receives jobs into the system and processes all output data produced by the jobs.*

Job

A unit of work defined by a user that is to be accomplished by a computer. Loosely, the term job is sometimes used to refer to a representation of a job. This representation may include a set of computer programs, files, and control statements to the operating system.*
