

OPT - Control of Natural Optimizer Compiler

This Natural profile parameter is for mainframes only.

It only applies if the Natural Optimizer Compiler is to be used.

This parameter corresponds to the macro NTOPT in the parameter module. It can be used to specify dynamically the same options which you can specify statically with the macro NTOPT.

Possible settings		See the Dynamic Profile Parameter OPT in the Natural Optimizer Compiler documentation.
Default setting	OFF	
Dynamic specification	YES	This parameter can only be specified dynamically.
Specification within session	YES
