

# Tools

The Natural Object Handler provides special features to display status information and reports and check or modify trace settings.

Below is information on:

- Status
  - Last Result
  - Traces
  - Reports
- 

## Status

Displays the Object Handler functions currently used, the user environment, the workplan library and the setting of the trace option described below. To display the status, enter the command `SHOW STATUS`. See also the section `Commands for CUIs`.

## Last Result

Displays the last internal command issued by the processing interface of the Object Handler and possible return codes and messages. To display the last result, enter the command `SHOW LAST RESULT`. See also the section `Commands for CUIs`.

## Traces

Activates or deactivates the trace function. Traces record internal Object Handler program flows to provide control information for error diagnoses.

The trace option is set to `OFF` by default. To change the setting, see the command `SET TRACE` as described in `Commands for CUIs`.

## Reports

Lists the objects loaded, unloaded or scanned, and records errors that may interrupt processing. See also `Work File Options` in the section `Settings`.

The report option is set to `ON` by default and is displayed after the unload, load or scan function has been executed. To display the contents of the latest report file, enter the command `SHOW REPORT` as described in the section `Commands for CUIs`.
