

BATCH - Batch Mode Simulation

This Natural profile parameter is for UNIX/OpenVMS and Windows platforms only.

It sets the system variable *DEVICE to "BATCH" when Natural is started.

Possible settings	specified	When started with parameter BATCH, error messages under Windows 98/ME/NT/2000 are not displayed, but written to a log file. The log file is named natbatch.log and is located in the Natural binary directory.
Default setting	not specified	Error messages under Windows 98/ME/NT/2000 are displayed but not written to a log file.
Dynamic specification	YES	This parameter can only be specified dynamically.
Specification within session	NO	

To run Natural in real batch mode use parameter BATCHMODE instead of BATCH.
