

USIZE - Size of User Buffer

This Natural profile parameter is for UNIX/OpenVMS and Windows platforms only.

It indicates the size of the user buffer in virtual memory. The user buffer contains all data dynamically allocated by Natural.

Possible settings	0 or 10 - 1024	Buffer size in MB.
Default setting	10	
Dynamic specification	NO	
Specification within session	NO	

Note:

If USIZE is set to zero, the memory capacity will be unrestricted.
