

Super Natural Tutorial - Overview

This documentation introduces you to using the most important functions in Super Natural and guides you through adding 11 sample transactions.

Using these sections, you can gain hands-on experience of the product by creating practical examples.

The sample transactions provide an introduction to the major features of Super Natural.

The description of how to create the first transaction Sample1 is very detailed. The other transaction descriptions refer to parts of the first description when procedures are identical.

The descriptions of the first two transactions guide you through adding transactions using the Help, Asterisk List and Continue functions. The other descriptions tell you how to create the transactions as quickly as possible.

The transaction descriptions tell you where you can obtain further information on certain subjects.

The sample transactions use the demonstration files supplied with Super Natural.

The transaction descriptions assume that you have the following default transaction modes:

```

      Help          Exit          Flip          Canc
09:22                ***** Super Natural *****          06.Jan.1998
SNPROF                - Modify Profile -          Wednesday

                                +---Transaction Modes Reporting---+
                                !

                                !
                                ! Data Change ..... N None !
                                !
                                ! Report Type ..... L List !
                                ! Report Level .... D Detailed !
                                !
                                ! Destination ..... S Screen !
                                !
                                ! Run Mode ..... O Online !
                                !
                                X Transaction Modes ! Batch printer ... (0 - 31) !
                                ! RJE available ... N (Y/N) !
                                !
                                +-----+
    
```

This documentation is organized in a number of example, each guiding you through a sample transaction. The transactions concentrate on the following areas of Super Natural:

- Sample 1: Basic Transaction
- Sample 2: Worksheet
- Sample 3: User Fields, Calculation and Logical Conditions Editors
- Sample 4: Modes and User File
- Sample 5: Layout Editor
- Sample 6: File Link
- Sample 7: File Lookup
- Sample 8: Dynamic Input Fields
- Sample 9: RPC Service in Context Mode with Primary, Secondary and Lookup files
- Sample 10: RPC Service in Context Mode with Dynamic Input
- Sample 11: RPC Service in Direct Mode with Summary Functionality
